### IMPORTANT INFORMATION ABOUT THE CLINICS:

Please be on time. If you do not arrive at your appointment time, you may be asked to reschedule.

Due to social distancing capacity and safety concerns, individuals will not be allowed to enter the building until their appointment time.

All vaccine recipients must complete a 15 minute observation period after their shot. Please expect the entire appointment to last 30-45 minutes.

If the vaccine you receive requires a second dose in 28 days, the second dose should be scheduled when you receive your first dose.

Individuals who meet the Phase One rollout category requirement and have previously decided not to make an appointment are allowed to change their mind! Accommodations will be made for all individuals in approved categories.

You will need your health insurance information to schedule your appointment. If you do not have health insurance please select the "no insurance" option. Nobody will be denied a vaccine for lack of insurance.

### **Why get vaccinated?**

- To Protect Yourself, Your Coworkers, Your Family, and Your Community. Getting the COVID-19 vaccine adds one more layer of protection for everyone.
- Building defenses against COVID-19 in your community is a team effort. And you are a key part of that defense.

**In the meantime we ask that you please continue to wash hands, social distance and wear your masks. It is critical that we remain vigilant in these practices.**

**Thank you,**
